

Please save the date for our Spring 2021 Virtual Engineering Design Day event which will be held via Zoom, on Wednesday, May 5, 2021, from 1:00pm-4:30pm.

Please register for the event at: https://SDSU.zoom.us/webinar/register/WN_zAnx12RgRi2ReAQ1KbUing

This is the largest College of Engineering event and it showcases the exciting and innovative design projects that our undergraduate Engineering students conceive, design and build during the academic year. Each of our Senior Design classes in Aerospace Engineering, Civil, Construction & Environmental Engineering, Electrical & Computer Engineering, and Mechanical Engineering will be participating. Over 85 projects were showcased at the 2020 Virtual Engineering Design Day event.

In the coming weeks, we will be posting on each Engineering Department website a listing of the projects that will be showcased at the Virtual Engineering Design Day event. Each project listing will include a picture and project description, a YouTube video link to students' project presentations, as well as an individual Zoom link for visitors to interact virtually and ask questions of our students regarding their projects.

Please continue to check our Engineering Design Day website for further information. This site also lists all of our past Design Day events.

As well, please view our 2020 Design Day Booklet which provides a picture and description of all projects that participated in the 2020 event.
