

J.R. Filanc Construction Engineering
and Management Program
College of Engineering

New Construction Management degree offered at SDSU.

Build more than a career in the Construction Industry!

Join us to help build the future of this country!

The J.R. Filanc Construction Engineering and Management (CEM) Program, which is part of the College of Engineering, is excited to offer the new Construction Management major in addition to the ABET-accredited and well-established Construction Engineering major. The Construction Management major will start in Fall 2021. The program will be one of the few in the nation to offer both degrees under the same department.

The J.R. Filanc CEM Program enjoys strong support from the local industry and our alumni community. The local industry provides philanthropic and professional support to educate our students by teaching courses and participating in guest lectures, hosting field trips, and mentoring our students in competitions, internships, and full time jobs. Students also benefit from multi-disciplinary coursework and research developed by our faculty in Civil and Environmental Engineering and Construction Engineering and Management.

You can apply to these majors on CalStateApply:
